(Other active SG roasters: Bettr, Brawn & Brains, Flip Roasters, Fazenda, Five Oars, Glyph Supply Co, Old Hen, etc. Many cafe-roasters supply multiple top cafes. Competition involvement: teams from Nylon, Homeground and others frequently contend in Singapore Barista/Cupping Championships.)

SECTION 4: MOST DISCUSSED ORIGINS & BEANS IN SINGAPORE (2024–2026)

- **Ethiopia (Yirgacheffe/Guji)** – The perennial favorite for clarity and floral notes. Many SG cafes (Apartment, Fluid, etc.) list Ethiopian washed and natural lots. **Varietals:** Native Heirlooms (e.g. Kurume, Gedeb). **Process:** Both washed and naturals; anaerobic naturals are trendy now (boosting fruitiness). *Where:* Apartment Coffee (e.g. Ethiopia Kello Raro ²²), Fluid, PPP menus.
- **Kenya (Kirinyaga, Kiambu)** – Known for bright acidity and berry notes. Often featured at Nylon and Homeground. **Process:** Washed. **Varietals:** SL28, SL34. *Community note:* Mentioned as key origin on menus (e.g. Apartment’s site lists Kenya ¹).
- **Panama (Gesha)** – Elite “holy grail” variety (perfume-like aromatics). Often sold in SG at premium. **Process:** Typically washed or natural. *Examples:* Panama Gesha from Wan Huai, Hartmann. *Where:* PPP (regular importer), Strangers’ Reunion pop-ups.
- **Yemen (Heirloom)** – Exotic complex beans (honeyed, winery sweetness). Less common but sought by enthusiasts for brew. *Process:* Sun-dried naturals. *Where:* Specialty shops like Kurasu occasionally, and Singapore’s Yemeni importers.
- **Colombia (Huehuetenango, Nariño, etc.)** – Smooth washed lots. **Process:** Washed/anaerobic. *Varietals:* Typica, Caturra, SL28. *Where:* Common Man, Dakota Coffees often stock these; homebrewers buy from local roasters’ selections.
- **Indonesia (Sulawesi Toraja, Java)** – Earthy, herbal cup. **Process:** Wet-hulled (Giling Basah). A staple single-origin in SG filter. *Varietals:* Catimor, Typica. *Where:* 20grams, Nylon, and many roasters include one Indonesian lot.
- **Trending processes:** Anaerobic naturals (fruit bombs) are a hot topic ²³. Honey-processed Ethiopian and co-fermented lots (e.g. cocoa pulp ferment) are also widely discussed.
- **Trending varietals:** Aside from Gesha and SL28, exotic varietals like Sudan Rume (Ethiopia), Parainema (Brazil), and rare Arabica wild/landraces get chatter among enthusiasts.
- **Price sensitivity:** High-end filter beans often range SGD 80–120/kg (specialty lots). For context, many cafes charge SGD 6–10 for filter beverages.

SECTION 5: FILTER BREW EQUIPMENT TRENDS IN SINGAPORE

- **Brewers:** Hario V60 and Kalita Wave remain staples. **Chemex** is popular in larger shops for shared “crowd brews”. **Aeropress** and **Clever Dripper** are used for experimentation (lately highlighted in homebrew circles). Upscale cafes also feature *Precision Brewers* (Tetsu Kasuya’s) and *Ceramic pourers*.
- **Grinders:** Commercial cafes commonly use **Mahlkönig EK43** (for filter) and EK43S or **Robur** for ultra-fine grind; **La Marzocco Swift** for espresso. High-end boutiques invest in **Niche Zero** or **Comandante** for single-cup shops. **Lagom P64** and **Wilfa** home grinders are frequently mentioned by home brewers online.
- **Water treatment:** Many cafes pre-treat water (TDS ~150 ppm) or use bottled spring water (common practice among competitive baristas). **Dechlorination** (carbon filters) is universal. Roslebitters (pH-adjusted mineral packets) see occasional mention in brewing blogs.
- **Community commentary:** Enthusiasts on forums stress the EK43’s role in professional filter setups, and often debate “best grinder for V60” (e.g. Mahlkönig E80 vs. EK43). CKOI – very little published data, but community consensus is EK43s and slow-burn kettles (Hario Buono) as default gear.

SECTION 6: COMMUNITY INTELLIGENCE SUMMARY

- **Top Cafés by Enthusiasts:** Across Reddit and forums, **Apartment, NYLON, Homeground, Pocket (Flip), Fluid, 20grams, Asylum, Pinhole, and Cata** frequently recur as favorites. For example, one forum member calls Fluid and Homeground their “current favs for filter” ⁴. Travel blogs similarly highlight Nylon, Homeground, Pocket, Kyuukei, Pinhole, Apartment, Asylum, Maxi and others as best spots (though not all are filter-first) ².
- **Highly-Recommend Beans/Roasters:** Enthusiasts specifically praise single-source lots. A HardwareZone user recommended Fluid Collective’s “*Abamecha*” (Ethiopia natural) as a must-try ⁹. Others mention Homeground’s Kenyan and various PPP lots. Homebrew communities also buy beans from local roasters (Percolate’s TimWendleboe offerings, Slurp Singapore’s shifts) and Malaysian boutique roasters (One Half Coffee).
- **Criticisms:** Some trendy cafes attract critique if execution lags. For instance, a few users note that certain lively-named cafes sometimes focus more on ambiance than consistency. (No hard citations, but typical online chatter flags places where pour quality or coffee data transparency is lacking.) Additionally, overpriced micro-lots (e.g. super-rare Geshas) can draw eye-rolls if not served expertly.
- **“Holy Grail” Beans:** Ethiopian and Panamanian Gesha continually get “holy grail” mentions for filter fans. The rare anaerobic naturals (like Burundi or Brazil superfruits) also command cult interest. While quantitative data is scarce, community consensus holds that the chase for the “perfect filter coffee” often centers on these exotic lots.
