Origin Intelligence

8 ORIGINS // 3 CONTINENTS

BR Brazil MOGIANA // CERRADO // FAZENDA 06 Arara (Obatã × Yellow Catuaí) · Catucaí 24/137 · Brasil Mogiana Natural · Serra dos Ciganos · Santuário Sul · House Natural. Brazil dominates your archive with diverse varietals across low-acid, high-body profiles.	ET Ethiopia VIRGACHEFFE // GEDEB // GUJI 04 Banko Gotiti Heirloom Washed · Beloya Natural · COE#1 2024 Basha Bekele Anaerobic · Guji Gerba Heirloom Washed. Birthplace of Arabica — heirloom genetics at 1,900–2,300 MASL.	KE Kenya KIRINYAGA // NYERI // KIAMBU 03 Kiamugumo AA Washed · Ndiaini AA Washed · (Menu: Kirinyaga Njemu AA). SL28 / SL34 genetics. Classic Kenyan phosphoric acidity and blackcurrant complexity.
CO Colombia CAUCA // QUINDÍO // ARMENIA 03 La Laja (Sudan Rume Washed, James Fernández) · Castillo Watermelon Co-Ferment (Jairo Arcila) · Wush Wush Washed. Milestone origin — Holy Trinity Sudan Rume completed here.	PA Panama / Peru CHIRIQUÍ // JAÉN // CAJAMARCA 03 Corpachi Geisha Red Honey (Boquerón, Panama) · Peru Gesha Washed — Wilder Garcia (Jaén) · Peru Gesha Iced Flash-Chill (Cajamarca). Elite high-altitude Geisha genetics.	NI Nicaragua MATAGALPA // NUEVA SEGOVIA 02 Matagalpa Washed (Agora) · Buena Vista Parainema Natural Anaerobic (Nylon). Parainema is a IHCAFE hybrid known for thick body and disease resistance — ideal for espresso.
IN India RATNAGIRI // COORG 01 Project Pearl Ratnagiri Experimental Anaerobic (Subko Mumbai). Rare coastal terroir — Indian specialty is an emerging scene. Processed with advanced anaerobic techniques rivaling Colombian craft.	ID Indonesia BALI KINTAMANI // SULAWESI TORAJA 03 Bali Karana Kintamani Natural · Sulawesi Toraja Semi-Washed (Wet-Hulled) · House Blend Piccolo. Wet-hulled (Giling Basah) produces classic earthy, heavy-body Indonesian expression.

Mahlkönig EK Omnia

98mm FLAT BURRS // EK SERIES

Your most-used grinder in 2026. Next-generation 98mm flat burrs deliver elite particle uniformity across the entire grind spectrum. Near-zero fines prevents bitter over-extraction. The industry benchmark for filter clarity.

Burr diameter	98mm flat
Burr type	Flat (Unimodal distribution)
Best for	Filter, pour-over, lean ratios
Flow coeff K	Precision uniform

USED IN: #018, #020, #021, #022

FM-Grinder 120mm

120mm MASSIVE FLAT BURRS // COMMERCIAL

The largest flat burr set in your archive. 120mm surface area creates exceptional coarse particle precision with virtually zero fines. Eliminates muddiness entirely. The choice for rare genetics (Sudan Rume) where burr quality equals varietal expression.

Burr diameter	120mm flat
Noise level	Exceptionally quiet
Particle uniformity	Near-perfect
Best for	Rare varietals, flat-bottom extraction

USED IN: #015 (Holy Trinity Sudan Rume)

Timemore Sculptor 078

SSP BURRS // HYBRID GEOMETRY

SSP (Sim Sung Precision) burrs installed. Preferred for coarse precision without thinning body — the critical balance for co-ferment and washed Gesha extractions. High uniformity across a wider grind range than standard commercial grinders.

Burr type	SSP (aftermarket)
Best for	Coarse precision, body retention
Burr geometry	Hybrid flat
Used with	Pour-over, V60

USED IN: #016 (Castillo Co-Ferment), #017 (Peru Gesha)

Lagom P64

64mm FLAT BURRS // SINGLE DOSE

Weber Key single-dose grinder. High uniformity 64mm flat burrs. Used for the Peru Gesha iced flash-chill — flat burrs + flat-bottom = clarity bias for washed Gesha florals (jasmine, caramel, lime).

Burr diameter	64mm flat
Type	Single-dose, zero retention
Best for	High-clarity filter, iced pour-over

USED IN: #013 (Peru Gesha Iced Flash-Chill)

Mahlkönig EK43

98mm FLAT BURRS // CLASSIC REFERENCE

The industry reference grinder. 98mm burrs with slightly different cutting geometry vs. the Omnia. Used at Lume Cafe (Entry #014) for the Corpachi Geisha dual-temperature V60 — clarity bias perfectly matched to Red Honey Geisha.

Burr diameter	98mm flat
Industry role	Benchmark reference
Best for	Filter (high clarity), espresso

USED IN: #014 (Corpachi Geisha), #019 (Brazil Santuário Sul)

xBloom Automated Precision Brewer

FLAT-BOTTOM WAVE DRIPPER // ROBOTIC POUR

Nylon Coffee Roasters' primary brewer. Solid-State Pouring Technology replicates precise barista pour patterns with robotic consistency. Flat-bottom geometry prevents bypass, promotes even extraction bed. Used with EK Omnia — the most technologically advanced pairing in your archive.

Brewer type	Flat-bottom / Wave-style
Pour control	Robotic / Automated
Bypass	Near-zero (flat geometry)
Flow coeff K	~1.0 (even)

USED IN: #020 (Brazil Arara), #022 (Ethiopia Banko Gotiti)

PANAMA // PERU // COLOMBIA // HARI // ARCHIVE		ANALYTICS		ORIGINS		ALL ENTRIES		HARDWARE		VARIETALS		MILESTONES		ETHIOPIA LANDRACE // GROWN IN		EQUADOR		TITLE BREEDING		EXPERIMENT		ARCHIVE	
The Holy Grail varietal. Ethiopia-origin (Gesha village, Kaffa) → Introduced to Panama 2004. Distinctive elongated bean. Jasmine, bergamot, stone fruit, white tea. Entries: #013, #014, #017		Ancient, rare, low-yielding. Competition-prized. Intense raspberry/nectarine aromatics. The Holy Trinity final piece. Raspberry = citric, Nectarine = malic. Entries: #015		Ancient Ethiopian cultivar transplanted to Colombia. Extremely elongated bean structure, delicate tea-like mouthfeel. Signature: incredible clarity, minimal body. Holy Trinity Leg 2. Entries: #008		Refined Typica from Ecuador's Pichincha. Exceptional malic/citric balance, velvety clarity, creamy mouthfeel. Documented thermal phase shift: citric (lime hot) → malic (plum cool). Entries: #018		Arara ★★		Catucaí 24/137 ★★		Castillo (Co-Ferment) ★		Parainema ★		Ethiopian Heirloom		SL28 / SL34 (Kenya AA)					
BRAZIL // OBATĀ × YELLOW CATUAÍ CROSS		BRAZIL // ICATU × CATUAÍ SELECTION		COLOMBIA // COLOMBIAN HYBRID BREED		NICARAGUA // IHCAFE HYBRID		Natural cross discovered 1988. Uniquely high acidity for Brazil. Obatā heritage (Timor Hybrid lineage) provides lipid density. Survived 1:17 lean ratio with body intact. Competition winner 2019 (92.5 SCA). Entries: #020		High-lipid content from Icatu (Robusta lineage) parent. Ideal for espresso-milk integration. Lingering praline/hazelnut finish. Milk proteins bind lipids for dense syrupy matrix. Entries: #021		Standard Colombian variety elevated by Jairo Arcila's watermelon co-fermentation. Processing-driven identity — ester engineering creates watermelon/mint esters genetically absent from Castillo. Entries: #016		IHCAFE (Honduras) disease-resistant hybrid. Medium-high lipid content. Under anaerobic natural processing + espresso emulsification = thick, savory fermented body. Not sweet. Long acetic linger. Entries: #023		650+ smallholder "garden coffee" landraces. Bergamot, lemon, melon, white tea. Classic washed Yirgacheffe archetype. Slow maturation at 2,300m locks in sugars. Entries: #022		Scott Lab 1930s selections. Phosphoric acid dominant — blackcurrant, dark plum, mango. AA screen size (≥18) = denser beans. Your Kenyan baseline comparators at Kyuukei. Entries: #004, #005					

 ACHIEVED The Holy Trinity Geisha (Washed) + Wush Wush (Washed) + Sudan Rume (Washed) — all three ancient/rare varietals audited in washed format. Completed 01 Apr 2026 at Maxi Coffee Bar.	 ACHIEVED Thermal Phase Shift Documented citric → malic acid transition as cup cools. Hot = lime (citric). Cooled = plum (malic). Typica Mejorado, Hacienda La Florida, JB. Entry #018.	 ACHIEVED 1:17 Ratio Mastery Aggressive 1:17 lean ratio rescued by EK Omnia + xBloom flat-bottom hardware. Natural Arara maintained body + malic clarity. Nylon Coffee Roasters standard validated. Entries #020, #022.
 ACHIEVED Milk-Lipid Integration Catucai 24/137 espresso lipids + steamed milk proteins = lingering praline/hazelnut matrix. Shift from sharp fruit to caramelized sweetness. Entry #021.	 ACHIEVED 4-City Field Research Singapore · Ubud, Bali · Mumbai, India · Johor Bahru. Cross-continental terroir comparison spanning Indonesia, India, Malaysia, Singapore.	 PENDING Laurina Varietal Low-caffeine, high-sweetness varietal from Reunion Island. Unique sugar profile without the bitterness baseline. Target: next specialty cafe visit.
 PENDING Eugenioides	 PENDING La Laja Geisha #024	 PENDING JB Cafe Identification
